General Comments and Suggestions *

Observation:

The current curriculum is skewed and concentrates on wet lab industries and its applications. Wet labs opportunities in India are mostly dominant with generic drug development. Thus, the human resources in wet labs faces exploitation of labour, pay and irregular work life balance.

Many Pharma and Scientific giants eg: Elli Lilly, Novartis, Novo Nordisk, Thermo Fisher, GSK, Teva etc have humongous service-based campuses(also called dry labs) set up in India which could be fuelled by graduates from science background(now its mostly dominated by B.Pharm, M.Pharm and PharmD graduates).

The major service domains which pharma giants look for are : Pharmacovigilance (Clinical/Post marketed), Medical writing(Clinical writing and Aggregate Reporting), Regulatory Department, Supply chain etc.

Suggestions:

- Finishing school to educate and to make students employment ready for the dry lab responsibilities.
 - Corroborating dry lab topics and drug development life cycles in the curriculum.
 - Inclusion of state-of-the art skill development programme in final year curriculum which includes: scientific writing, regulatory affairs updates etc.
 - Periodic invited talks and workshops from industry experts which can give the students a greater insight.
-

General Comments and Suggestions *

In my opinion, practical sessions should be given utmost importance. Students must try to get to know and understand the intention and principal of the practical sessions than just performance of the experiment. And try and get more hands on experience in cell culture based experiments. To understand and be able to execute trouble shooting will be of great help in a industry setup.

General comments and suggestions

In the modules for energy the role of nuclear energy is missing and needs to be balanced because India's growing energy needs cannot be met without Nuclear.

General comments and suggestions

Let us explore to include topics on latest Industrial needs in PV Solar Cell technology such as PERC, Pervoskite, and High Efficiency development aspects. We cld have Bench mark references from NationalUniversity of Singapore, NSW Australia etc.,

This is very critical considering OUR National mission to achieve 750 GW of Renewable Energy and EVchatging stations.

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

A compulsory research article with an industry expert may be added. This helps to create research mindset and improves the communication skills along with networking opportunities.

If a student is doing internship, a report of the same may be submitted signed by the organization. This may help us to connect with potential recruiters in future and serve as a repository.

Industry based workshops may be conducted on key actuarial concepts and applications.

Provide your general comments on the overall effectiveness of the programme in terms of professional suitability and employability *

It fits the standards of the actuarial institute.

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

Excellent coverage of diverse areas of accounts, finance, compliance , tax etc.. This would set the base for developing finance and accounting professionals with a global view. No change in curriculum is needed.

Provide your general comments on the overall effectiveness of the programme in terms of professional suitability and employability *

Extremely thoughtful design of the curriculum keeping in mind the higher studies in professional accounting and finance. Students successfully completing this course will also be able to directly apply and get placed into global organizations.
