Excellent

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

A workshop on marketing tools on social media and SEOs will be very value adding to the students. Understanding the various software like SAP would be good, at least an introduction to the platforms and tools used in the industry.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Academic progression was good, adding some component of prep for competitive exams would be good, we did have Quants classes, but they were basic in comparison to what is required in the outside world.

2) Soft Skill Development *

Nothing to be added here, the opportunities are there for the students, they just dont take it.

3) Industry Readiness *

Students will be able to handle the industry, however my batch did go into the industry at the height of the pandemic and hence we all did have a lot of trouble, post covid updation of the syllabus is very important for the students.

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

What we are thought is a good way to learn in theory, but we need to be able to have practical application for the same. Case studies and CIA reports are just done with an intention to complete by the students. We need to integrate our syllabus with actual application because it will help us (the students) to be more interested towards the syllabus and also give us an edge when we start working in the corporate or in our own business. What can be added- more varieties on our add on courses (dynamic to the current market demands - ex big data, how to invest our money and take care of our assets, integrating coding with finance (for fintech).

Scenario simulations with role play (crisis management) - more interpretation of data courses , ethics and situation handling at the corporate levels, importance of holistic ideas such as discipline,integrity, profesional behaviour into our daily schedule etc.

Students can be given a clear idea on the type of jobs that will be available (description, skills required apart from just their professional qualifications to ensure they work on them side by side along with our formal education.)

Open to have conversations with the department with more inputs or to explain the above in detail. :)

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

CIMA was very helpful. Undergraduate degree didn't give us as much as it has the potential to help us.

2) Soft Skill Development *

Additional events such as festing did help develop confidence and other various skills

3) Industry Readiness *

We were industry ready.

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

Practical industry exposure should be given to the students by having a seminar by calling big industry experts and startup's so they can provide their experience how they started and what are difficulties they faced in the Indian market.About the hindrances they faced during the starting point of the company and did the government support them

Overall the syllabus was good and helped us strengthen our concepts , however, after joining an organization, I felt that we received very little practical exposure which is a very important element.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Satisfactory

2) Soft Skill Development *

I have no comments on this as I was very happy with how we were groomed on this aspect.

3) Industry Readiness *

As mentioned earlier, some amount of practical experience pertaining to the field we perform would have helped us.

Subjects like research can be removed. Add- Accounting esp indepth knowledge on indian Accounting standards and IFRS. Usage of Excel. Teaching analytical tools like SAP, Power Bi etc. Which is actually used by companies. We were made to use a platform (can't recollect the name) which was first never taught us properly, neither was it completed, second never used it or heard of it later on.

Application based learning

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Especially in subjects like audit , examples with work life can be provided

2) Soft Skill Development *

Excel should be taught in a much slower pace in such a way that everyone is able to understand.

3) Industry Readiness *

Bring in alumni from different job fields to talk to students so they know the job profile they want to get into even better.

Excel should be a mandatory subject, teach the subject through excel make students work the sums in excel so that it will be easier for them to do the sums faster during acca papers they will get a good practice

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

The basic concept of audit is thought and subjects should be made in such a way that they can use it in work, scenario questions should be thought.

2) Soft Skill Development *

Communication, like online communication is very necessary these days, other language classes like German, French etc should be thought as credit courses which will be of better use, definitely mandatory excel classes should be give as work is done in excel so are the acca exam,

3) Industry Readiness *

To give a better insight of interview, like training for them. To have ppl from industry come and give views on how the industry actually works, which is extremely different from what has been thought. To go to jobs as per preference

Taking an internship during my first and second year vacations made me better understand what I wanted from my career. I think if it was mandatory for the course it would enhance more students' learning experience.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

I enjoyed the subjects provided by the university, especially in my third year.

2) Soft Skill Development *

The tableau and advanced excel course were helpful for me when I first started work.

3) Industry Readiness *

For me personally, it was our subject professors' advice that helped me at my job rather than subjects like business etiquette and corporate grooming. I believe that these things are better learned with experience rather than having someone teach them to you in your first year of college.

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

Department should focus a bit more on the development of Business Communication skills of the students (Email writing specifically). Not everyone's Email writing is in par with Industry standards and the Industry as a whole has a huge expectation when it comes to the students of DPS.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Effective.

2) Soft Skill Development *

Department does an excellent job. However, there's lot of scope for improvement. Department could think of initiating certificate courses or electives where individual attention could be given to interested students and could be groomed on various aspects.

3) Industry Readiness *

There's lot of focus on finance related areas. However, I feel department as a whole should give more focus to other areas as well (along with finance) such as Business Analytics, HR, Marketing, Media, Entrepreneurship, supply chain/logistics etc.

Cause many at times; I've come across people with interest in these other areas and the department doesnot seem to give much importance to the non-finance areas.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Within a period of three years, I was able to learn many new concepts from various subjects. I am sure that the concepts I've learned can be applied when I start working.

2) Soft Skill Development *

I have become more confident in terms of communicating with a group of people.
I have also become independent in coming up with solutions for various problems that I face.

3) Industry Readiness *

I believe I am capable of working in a top organization.

More finance subjects from sem1, CIAs to be more practical (real life scenarios), more add on courses options throughout the 3 years, like big data, AI, Six Sigma, SAP (as I had an option of only 3 - Tableau, Python and Advanced Excel), ACCA subjects to be taught a little before so that it makes it better when we're giving exams

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

The current curriculum is framed very well

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Great knowledge gained from faculties working in that industry.

2) Soft Skill Development *

Great.

3) Industry Readiness *

It helped to adapt to the working atmosphere.

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

As i had Finance as my specialisation i can say that only bookish and conceptual knowledge is not enough looking at the current environment students have to be given practical knowledge of the functioning of capital markets . Only solving problems of capital market is not going to help any body in the real life. Most people do not have practical knowledge of even how to manage personal Finance or how to even use a demat account and step into the markets. Only theoretical knowledge of technical analysis when the students mug up the concepts and just write ling paragraphs in the exams to get marks is not gonna help even a bit in there life.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Good- people get good apporrtunity to add new courses and knowlegde in there career

2) Soft Skill Development *

Great

3) Industry Readiness *

We are only making students ready to work for companies like the big 4 where the are trained in the company to do exactly what is needed, once they step out of such companies every thing is different.

Excel as a proper course rather than just a 2 days certificate program.

IT in business - Syllabus for this subject need to be updated. It should include how major ERPs like SAP and Microsoft AX operate rather than just defining what an ERP is.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Most of the subjects were taught from a theoretical perspective rather than a practical one.

2) Soft Skill Development *

This course has surely helped me improve various soft skill needed in the corporate world.

3) Industry Readiness *

There was a lot that I learnt on the job that I thought I could have learnt it in college.

A workshop on marketing tools on social media and SEOs will be very value adding to the students. Understanding the various software like SAP would be good, at least an introduction to the platforms and tools used in the industry.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Academic progression was good, adding some component of prep for competitive exams would be good, we did have Quants classes, but they were basic in comparison to what is required in the outside world.

2) Soft Skill Development *

Nothing to be added here, the opportunities are there for the students, they just dont take it.

3) Industry Readiness *

Students will be able to handle the industry, however my batch did go into the industry at the height of the pandemic and hence we all did have a lot of trouble, post covid updation of the syllabus is very important for the students.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Good course content. Hence it helped me gain a vast knowledge on various aspects of Management courses and Insurance subjects

2) Soft Skill Development *

several sessions conducted on soft skill development have helped me in my work place

3) Industry Readiness *

Very helpful insights and training on Industry readiness

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

What we are thought is a good way to learn in theory, but we need to be able to have practical application for the same. Case studies and CIA reports are just done with an intention to complete by the students. We need to integrate our syllabus with actual application because it will help us (the students) to be more interested towards the syllabus and also give us an edge when we start working in the corporate or in our own business. What can be added- more varieties on our add on courses (dynamic to the current market demands - ex big data, how to invest our money and take care of our assets, integrating coding with finance (for fintech).

Scenario simulations with role play (crisis management) - more interpretation of data courses , ethics and situation handling at the corporate levels, importance of holistic ideas such as discipline,integrity, profesional behaviour into our daily schedule etc.

Students can be given a clear idea on the type of jobs that will be available (description, skills required apart from just their professional qualifications to ensure they work on them side by side along with our formal education.)

Open to have conversations with the department with more inputs or to explain the above in detail. :)

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

CIMA was very helpful. Undergraduate degree didn't give us as much as it has the potential to help us.

2) Soft Skill Development *

Additional events such as festing did help develop confidence and other various skills

3) Industry Readiness *

We were industry ready.

Practical industry exposure should be given to the students by having a seminar by calling big industry experts and startup's so they can provide their experience how they started and what are difficulties they faced in the Indian market.About the hindrances they faced during the starting point of the company and did the government support them

Overall the syllabus was good and helped us strengthen our concepts , however, after joining an organization, I felt that we received very little practical exposure which is a very important element.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Satisfactory

2) Soft Skill Development *

I have no comments on this as I was very happy with how we were groomed on this aspect.

3) Industry Readiness *

As mentioned earlier, some amount of practical experience pertaining to the field we perform would have helped us.

Subjects like research can be removed. Add- Accounting esp indepth knowledge on indian Accounting standards and IFRS. Usage of Excel. Teaching analytical tools like SAP, Power Bi etc. Which is actually used by companies. We were made to use a platform (can't recollect the name) which was first never taught us properly, neither was it completed, second never used it or heard of it later on.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Especially in subjects like audit , examples with work life can be provided

2) Soft Skill Development *

Excel should be taught in a much slower pace in such a way that everyone is able to understand.

3) Industry Readiness *

Bring in alumni from different job fields to talk to students so they know the job profile they want to get into even better.

Excel should be a mandatory subject, teach the subject through excel make students work the sums in excel so that it will be easier for them to do the sums faster during acca papers they will get a good practice

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

The basic concept of audit is thought and subjects should be made in such a way that they can use it in work, scenario questions should be thought.

2) Soft Skill Development *

Communication, like online communication is very necessary these days, other language classes like German, French etc should be thought as credit courses which will be of better use, definitely mandatory excel classes should be give as work is done in excel so are the acca exam,

3) Industry Readiness *

To give a better insight of interview, like training for them. To have ppl from industry come and give views on how the industry actually works, which is extremely different from what has been thought. To go to jobs as per preference

Taking an internship during my first and second year vacations made me better understand what I wanted from my career. I think if it was mandatory for the course it would enhance more students' learning experience.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

I enjoyed the subjects provided by the university, especially in my third year.

2) Soft Skill Development *

The tableau and advanced excel course were helpful for me when I first started work.

3) Industry Readiness *

For me personally, it was our subject professors' advice that helped me at my job rather than subjects like business etiquette and corporate grooming. I believe that these things are better learned with experience rather than having someone teach them to you in your first year of college.

Department should focus a bit more on the development of Business Communication skills of the students (Email writing specifically). Not everyone's Email writing is in par with Industry standards and the Industry as a whole has a huge expectation when it comes to the students of DPS.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Effective.

2) Soft Skill Development *

Department does an excellent job. However, there's lot of scope for improvement. Department could think of initiating certificate courses or electives where individual attention could be given to interested students and could be groomed on various aspects.

3) Industry Readiness *

There's lot of focus on finance related areas. However, I feel department as a whole should give more focus to other areas as well (along with finance) such as Business Analytics, HR, Marketing, Media, Entrepreneurship, supply chain/logistics etc.

Cause many at times; I've come across people with interest in these other areas and the department doesnot seem to give much importance to the non-finance areas.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Within a period of three years, I was able to learn many new concepts from various subjects. I am sure that the concepts I've learned can be applied when I start working.

2) Soft Skill Development *

I have become more confident in terms of communicating with a group of people.
I have also become independent in coming up with solutions for various problems that I face.

3) Industry Readiness *

I believe I am capable of working in a top organization.

Along with the conceptual knowledge practical knowledge also has to be included .

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

The highly qualified lectures gave us experience on the professional development

2) Soft Skill Development *

The extra subjects in semesters helped us gain knowledge from different sectors.

3) Industry Readiness *

The experience shared by the lectures who were working gave us an idea about corporate work and their requirements.

Excellent

Based on your work experience, identify area/s which can be added/removed to strengthen the current curriculum. *

As i had Finance as my specialisation i can say that only bookish and conceptual knowledge is not enough looking at the current environment students have to be given practical knowledge of the functioning of capital markets . Only solving problems of capital market is not going to help any body in the real life. Most people do not have practical knowledge of even how to manage personal Finance or how to even use a demat account and step into the markets. Only theoretical knowledge of technical analysis when the students mug up the concepts and just write ling paragraphs in the exams to get marks is not gonna help even a bit in there life.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Good- people get good apporrtunity to add new courses and knowlegde in there career

2) Soft Skill Development *

Great

3) Industry Readiness *

We are only making students ready to work for companies like the big 4 where the are trained in the company to do exactly what is needed, once they step out of such companies every thing is different.

Excel as a proper course rather than just a 2 days certificate program.

IT in business - Syllabus for this subject need to be updated. It should include how major ERPs like SAP and Microsoft AX operate rather than just defining what an ERP is.

Your Comments on Programme Effectiveness

Based on your work experience, provide your general comments on the overall effectiveness of the programme in relation to:

1) Academic Progression *

Most of the subjects were taught from a theoretical perspective rather than a practical one.

2) Soft Skill Development *

This course has surely helped me improve various soft skill needed in the corporate world.

3) Industry Readiness *

There was a lot that I learnt on the job that I thought I could have learnt it in college.
